

THIRD PARTY EMAIL REQUIREMENTS

There are three things that we require from your team to have your email created:

- HTML file of the email (further details below)
- Subject Line
- A plain text file containing unformatted text from the eblast (please note: all URL directs must be fully written out as hyperlinks will not work in this version)

HTML FILE REQUIREMENTS

- 600 pixels wide (fixed, centered 600 wide table)
- No Javascript
- No Macromedia Flash
- No video
- No audio
- No plug ins (including Java)
- No forms or form elements
- No CSS for positioning
- No CSS layers
- No background images in tables or table cells
- No animated gifs — there is limited support for animated gif, in some environments only the first frame is displayed
- All IMG SRC paths must be fully qualified — i.e. start with http://
